

Smart Board Solutions

Technology changed

Whiteboards To SMART Boards

As mobile computing technologies continue to become incorporated in the classroom, so do complimentary technologies that re-define classroom communication and collaboration. Interactive whiteboards are gaining popularity as one of the technologies that make instruction and learning more engaging. These systems allow educators to create engaging, interactive learning experiences

Five opportunities show the potential of mobile devices

1. Encourage "anywhere, anytime" learning
With portable Smart Bar (Edge Bar)
2. Reach under-served people / children
With handheld devices can help advance digital equity (inscribe pad)
3. Fit with learning environments
- With more accessories to enhance the learning and make it more clear (focus)
4. Improve 21st-century social interactions
Mobile technologies have the power to promote and communicate, which are deemed essential for success in this 21st-century
